Survival and Emergency Equipment

Contact us for complete information

We understand how difficult it is to gear up for an environment you have never been in before. Body type, age, gender, level of fitness and the climate you live in are all factors which determine your gear. Please feel free to contact us with any questions. Remember, preparation can only raise the chance for success. It is more often the difference between a trip and an experience of a lifetime.

Good Luck
Sam and Jason
